

G. R. LOKESH

DevOps & DevSecOps Engineer | AWS | Azure | Kubernetes | Terraform | GitOps | Cloud Security

Hyderabad, India | +91 9100948285 | grlokesh96@gmail.com | [linkedin.com/in/grlokesh96](https://www.linkedin.com/in/grlokesh96) | Portfolio: grlokesh.online

PROFESSIONAL SUMMARY

DevOps & DevSecOps Engineer with 5+ years of experience building, automating, and securing production-grade AWS and Azure cloud platforms. Specialized in Kubernetes, Amazon EKS, Terraform, GitOps, CI/CD, and Cloud Security, with experience delivering secure and scalable microservices platforms. Accelerated release cycles by **45%**, reduced infrastructure provisioning time by **80%**, and lowered cloud costs by **30%** while maintaining highly available production environments.

TECHNICAL SKILLS

Cloud Platforms	AWS (EKS, IAM, MFA, S3 Lifecycle Policies, EBS Snapshots), Microsoft Azure (AKS, RBAC, Recovery Services Vaults)
Containers & Orchestration	Docker, Kubernetes, Helm, Istio, Karpenter, KEDA, HPA, Amazon ECR, JFrog Artifactory
IaC & Scripting	Terraform (Reusable Modules), Python, Bash
CI/CD & GitOps	Azure DevOps, GitHub Actions, Jenkins, Argo CD, Helm, Blue-Green and Canary Deployments
DevSecOps & Security	HashiCorp Vault (Agent Injector), Checkmarx One, SonarQube, Dependency-Check, Trivy, Checkov, Gitleaks, Syft (SBOM), Cosign, mTLS, SAST, SCA, IaC Scanning
Observability	Datadog, Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana), AWS CloudWatch, Azure Monitor

PROFESSIONAL EXPERIENCE

DevSecOps Engineer — ASICS Technologies

Jul 2024 – Sep 2026

- Architected GitOps CI/CD pipelines using GitHub Actions, Argo CD, and Helm for 20+ microservices on Amazon EKS, enabling Blue-Green and Canary deployments and reducing release cycle time by **45%**.
- Enforced Shift-Left security across CI/CD using Checkmarx One, Trivy, Checkov, and Gitleaks, reducing critical production vulnerabilities by **60%**.
- Implemented HashiCorp Vault for centralized secrets management, Kubernetes authentication, Vault Agent Injector, dynamic secrets, and least-privilege access.
- Established supply chain security and compliance using Syft (SBOM) and Cosign image signing across Amazon ECR and JFrog Artifactory registries.
- Reduced monthly cloud compute costs by **30%** through intelligent Kubernetes auto-scaling using Karpenter, KEDA, and Horizontal Pod Autoscalers (HPA).
- Deployed Istio Service Mesh across 20+ microservices, enforcing mTLS, traffic routing, service-to-service security, and distributed telemetry.
- Automated DevOps and cloud operations using Python and Bash, reducing manual operational effort by **40%** across deployments, monitoring, backups, and infrastructure tasks.
- Implemented end-to-end observability using Datadog, Prometheus, Grafana, and ELK (Elasticsearch, Logstash, Kibana), centralizing metrics, logs, and alerts while reducing MTTR by **50%**.

DevOps Engineer — Larsen & Toubro (L&T)

Aug 2022 – Jul 2024

- Designed CI/CD pipelines using Azure DevOps and Jenkins for 40+ microservices, reducing deployment cycle time by **45%** across AWS and Azure.
- Provisioned AWS and Azure infrastructure using Terraform, developing reusable IaC modules that reduced infrastructure provisioning time by **80%** across environments.
- Integrated SonarQube, Trivy, Dependency-Check, and Checkov into CI/CD for SAST, SCA, container, and IaC scanning, reducing critical vulnerabilities by **60%**.
- Containerized microservices using Docker, optimizing images with multi-stage builds and minimal base images, reducing image size by **60%** and improving deployment efficiency.
- Managed AWS EKS and Azure AKS clusters supporting 40+ microservices, using Helm and HPA to maintain **99.9%** availability.
- Automated Kubernetes application deployments using Helm and Argo CD, enabling consistent, version-controlled releases across Dev, QA, and Production environments.
- Resolved Kubernetes production incidents involving pod, networking, scheduling, and resource failures through systematic RCA and troubleshooting.
- Collaborated with development, QA, and security teams to troubleshoot deployment issues, improve release reliability, and document CI/CD workflows and deployment procedures.

Cloud Support Associate — Larsen & Toubro (L&T)

Sep 2021 – Jul 2022

- Provided L1/L2 operational support for enterprise AWS and Azure environments, troubleshooting infrastructure incidents and maintaining reliable cloud operations.
- Enforced cloud security and governance using AWS IAM policies, Multi-Factor Authentication (MFA), and Azure RBAC to implement least-privilege access controls.
- Managed backup, disaster recovery, and data retention using EBS snapshots, S3 Lifecycle policies, and Azure Recovery Services Vaults.
- Reduced cloud infrastructure costs by **30%** through resource right-sizing, removal of idle resources, storage optimization, and automated scheduled shutdowns.
- Monitored production infrastructure using AWS CloudWatch and Azure Monitor, developing SOPs and operational runbooks to standardize troubleshooting and incident response.

EDUCATION

Bachelor of Technology (B.Tech) in Civil Engineering

2015 – 2019

Annamacharya Institute of Technology and Science
